

DESCRIPTION

The LoRa Demo software is an evaluation tool for the Demo XTR-8LR100. It works as interface to the device in order to verify its functionalities and monitoring the activities. It communicates with the Lora board with a Serial RS232 communication via USB cable. For technical references refer to the User Manual.

REQUIREMENTS

- OS compatibility : Win XP, Win 7, Win 10.
- .NET Framework : 3.5 or above.
- Virtual COM Port (VCP) drivers already installed.
